OBJECTIVE

To leverage my extensive experience in full-stack development to lead innovative projects, mentor junior developers, and drive the adoption of cutting-edge technologies to deliver high-quality software solutions.

WORK EXPERIENCE

Synergix Technologies Pte Ltd - Singapore

2015 - 2017

JAVA DEVELOPER / SENIOR TECHNICAL LEAD

Responsibilities:

- Developed and maintained ERP systems with a focus on Supply Chain Management (SCM), Manufacturing (MFG), Finance, and Payroll modules.
- Designed and implemented scalable, high-performance web applications using Java, Spring Boot, Hibernate, and JPA.
- Collaborated with cross-functional teams to gather requirements, design solutions, and deliver high-quality software on time.
- Integrated third-party APIs and services to enhance system functionality and streamline business processes.
- Conducted code reviews, provided mentorship to junior developers, and ensured adherence to best practices and coding standards.
- Troubleshoot and resolved complex technical issues, ensuring system reliability and performance.

Achievements:

- Successfully led the migration of legacy systems to modern, cloud-based architectures, resulting in improved system performance and scalability.
- Implemented automated testing frameworks, reducing the time required for regression testing by 50%.
- Received recognition for consistently delivering high-quality software solutions that met or exceeded client expectations.

RocketLawyer - United State

2018 - 2021

SENIOR JAVA DEVELOPER

Responsibilities:

- Developed and maintained the Content Management System (CMS) that serves as the backbone of RocketLawyer's main website, driving all revenue-generating activities.
- Utilized Java, Kotlin, and Scala for backend development, and React for frontend development.
- Read and understood technical specifications, analyzed product requirements, designed features, implemented, and tested software components.
- Developed new applications, components, and functionality for existing CMS systems.
- Investigated alternate configurations and implemented better solutions to enhance system performance.
- Transitioned CMS systems to Headless CMS to achieve better performance and SEO.
- Upgraded CMS systems to newer versions of Bloomreach technologies and deployed them on Google Cloud.
- Developed an assets archiving system allowing bulk changes to existing content and scheduled jobs to run at specified times.

Paymentology - England

2022 - now

- Customized Bloomreach Plugins to adapt to complex business requirements not supported by standard plugins.
- Enhanced Bloomreach performance for large CMS systems.
- Used Spring Stack to create crawler systems to manage web content across multiple systems.
- Designed and implemented Search Services using Elasticsearch and Algolia.
- Designed, implemented, and deployed a checkout paywall to allow instant online legal service payments.
- Trained team members to work with CMS and JCR.

Achievements:

- Successfully enhanced the CMS, resulting in a 25% increase in website performance and user engagement.
- Implemented a new payment integration with Stripe, reducing transaction failures by 40% and improving customer satisfaction.
- Played a key role in the successful launch of several high-impact features that contributed to significant revenue growth.
- Received recognition for consistently delivering high-quality software solutions that met or exceeded business objectives.

SENIOR FULLSTACK DEVELOPER

Responsibilities:

- Develop and maintain fintech solutions, focusing on payment processing systems.
- Utilize Java, Kotlin, JavaScript, and ColdFusion to build robust, scalable applications.
- Develop web application using NestJS and Next JS/ React JS
- Leverage AWS services extensively, including Cognito, API Gateway, S3, Lambda, ECS, and EKS, for deploying, managing, and scaling applications.
- Design, implement, and deploy payment interfaces to work with Mastercom API V6.
- Design, implement, and deploy chargeback APIs using microservices architecture deployed to AWS.
- Design, implement, and deploy Clearing Gateway to process financial transactions from Mastercom, including Pre-Authorization, Authorization, Settlement, Chargeback, and Second Presentment.
- Design payment gateways to process ISO8583 messages.
- Work with Kubernetes and Docker to manage containerized applications and ensure efficient deployment and scaling.
- Perform performance tuning for financial systems to ensure optimal efficiency and reliability.
- Collaborate with cross-functional teams to gather requirements, design solutions, and deliver high-quality software on time.
- Integrate third-party payment APIs and services to enhance system functionality and streamline payment processes.
- Conduct code reviews, provide mentorship to junior developers, and ensure adherence to best practices and coding standards.
- Troubleshoot and resolve complex technical issues, ensuring system reliability and performance.
- Participate in Agile/Scrum ceremonies, contributing to sprint planning, daily stand-ups, and retrospectives.

Achievements:

- Successfully implemented new payment features that improved transaction efficiency and user satisfaction.
- Played a key role in the integration of multiple payment gateways, enhancing the system's flexibility and reliability.

- Optimized application performance and scalability using AWS services, resulting in a 30% reduction in operational costs.
- Conducted performance tuning for financial systems, leading to a significant improvement in transaction processing speed and system stability.
- Received recognition for consistently delivering high-quality software solutions that met or exceeded business objectives.

SKILLS

Backend

Java (Spring, Java EE, JPA, JTA, Spring Boot), Kotlin, Scala, Groovy, Coldfusion
Nest JS / TypeScript, ExpressJS
.Net

Frontend

React, TypeScript, GraphQL
Next JS

Database

Postgres, DB2, MicrosoftSQL, DynamoDB, Elasticsearch

Infrastructure

AWS , Google Cloud, Terraform, Docker/Kubernetes

Observeability

Datadog, Raygun, Cloud Watch, NewRelic

EDUCATION

2010 - 2015

COMPUTER SCIENCE

Hanoi University of Science and Technology

- Student of Center for Training of Excellent Students
- Specialized in Software Engineering.
- Completed coursework includes Data Structures and Algorithms, Web Development, Database Management, and Artificial Intelligence.
- GPA: 3.4/4.0 - One of the highest scores of the class and the university
